EDUCATION

Bachelor of Technology (B.Tech.) in Data Science | Expected Graduation: 2028
Mukesh Patel School of Technology Management and Engineering, NMIMS University | Mumbai, Maharashtra

- **CGPA:** 8.49 / 10.0
- **Relevant Coursework:** Statistics, Machine Learning, Python, Data Processing and Analysis

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL (Basic), C++ (Basic)
- **Tools & Platforms:** Excel, Power BI, Tableau, VS Code, Jupyter Notebooks, GitHub, Docker
- **Cloud Services (AWS):** EC2, ECS, S3, SQS, Lambda

EXPERIENCE

Business Analyst Intern | Brizall Grounding Systems | April 2026 – June 2026
Vapi, Gujarat | Work From Home

- Built and set up automated sales systems and lead-nurturing workflows to cut down manual follow-up work for the team.
- Looked into sales pipelines and day-to-day operational data to figure out where leads were dropping off and how to fix it.
- Put together visual reports and dashboards to clearly show key business trends to senior management.

Data Analyst Intern | Rifa Pharma | September 2024 – December 2024
Mumbai, Maharashtra

- Cleaned and analyzed large operational datasets to track key business performance trends and speed up internal reporting.
- Created regular reports and data pipelines that made tracking metrics a lot faster and less prone to manual errors.
- Designed charts and presentations to break down complex data findings so leadership could easily act on them.

PROJECTS

Sales Automation Engine | [GitHub Link]
Python, Multi-Agent Systems, WhatsApp/Email APIs

- Built an automated lead generation and conversion pipeline using Python and multi-agent systems to scrape lead data and understand target company profiles.
- Generated personalized outreach prompts based on company context and automated message delivery via WhatsApp and email integrations.

ResecureOS (Digital Forensics & Security Tool) | [GitHub Link]
Python, C++, Data Recovery, System-Level Programming

- Developed a dual-language forensic tool handling system-level data recovery (image acquisition and hashing) and secure data erasure via disk overwriting to prevent recovery.
- Designed initial modules in Python for rapid prototyping, and rewrote performance-critical routines in C++ for fast, system-level file handling supporting JPG, PDF, and ZIP files.

Trading Signals Generator | [GitHub Link]
Python, Docker, AWS (ECS, EC2), Financial APIs

- Engineered a personalized trading signal generation engine allowing users to input custom parameters for real-time market insights.
- Containerized the application using Docker and deployed it scalably on AWS ECS, while maintaining a mirrored public codebase on GitHub.

COLLEGE ACCOMPLISHMENTS & LEADERSHIP

- **Venture Seed Funding Winner:** Won $3,300 in social venture capital seed funding for Venture Muskaan, awarded by The Resolution Project.
- **Global Academic Delegation:** Selected by the college to represent the institution at the Harvard World Model United Nations 2026 in Lima, Peru; participated in 10+ academic conferences, developing advanced cross-cultural and public speaking skills.
- **Leadership Roles:** Served as Public Relations Core Member for the MUN Society and Research & Development Core Member for Social Conclave.
- **Hackathons:** Competed nationally in 2 editions of the Smart India Hackathon, building tech-driven solutions for complex public problem statements.
